Overarching Security policy and plan

In accordance with industry ‘best practices’ and to comply with numerous compliance regulations, The company, has implemented various Information Security policies in order to protect the confidentiality, integrity and availability (CIA) of their critical client data and their computing resources. Proper implementation of these policies will ensure controls are in place to minimize risk of an exploit compromising either The company, computing resources or its confidential client data.’
Additionally with multiple worldwide locations some focus should be on the locations and venues involved.

Document Control

This document and the company security policies shall be reviewed annually and an update by The company may occur earlier if internal or external influences affect its validity.
